Work Experience

Alameda Health System, Oakland, CA

IT Service Center Technician

07/2018-Present

- Provides remote support for devices, systems, and clinical applications to 5000 end users across a multi-campus healthcare setting.
- Minimizes resolution times by triaging, prioritizing, and troubleshooting end user issues.
- Provisions user and group security access in Active Directory and account setup in O365.
- Creates clear and complete knowledge article solutions and ticket documentation to improve first call resolution rates.

Project Work

Serverless Static Site Hosted in AWS S3 Bucket

Technologies Used: AWS S3, SAM/CloudFormation, DynamoDB, API, GitHub, CloudFront, CI/CD GitHub Actions

- Serverless static website hosted out of an AWS S3 bucket using SAM/CloudFormation template.
- Updates DynamoDB database visitor's table utilizing Lambda function when API Gateway receives successful get request. Can be viewed on derekreason.io

COVID 19 Extract, Transform, and Load Dashboard

Technologies Used: Lambda, S3, Quicksights, DynamoDB, SNS, EventBridge

- Extracts, transforms, and cleans NY Times and Johns Hopkins COVID-19 data using Lambda function and autoloads to S3 bucket.
- Uploads to DynamoDB table utilizing Lambda triggers after loaded in S3 and then uploads to AWS Quicksights dashboard for presentation.

Managing a Hybrid AWS and on-premises environment with Systems Manager

Technologies Used: Ubuntu and Windows AMIs, Systems Manager, EC2, VPC

- Setup and configured on-premises and AWS managed servers that run as managed instances within Systems Manager.
- Setup and performed system inventory and patching using Patch Manager.
